Chapter 31 Special Construction

Section 3111.4.2 **3111.4.2 Solar-ready construction.** Newly constructed buildings shall be provided with a *solar-ready zone* complying with Sections 3111.4.1 through 3111.4.9.

Exceptions:

1. Detached one- and two-family dwellings, townhouses and accessory structures that comply with Residential Code.
- ~~2.1.~~ Group U occupancies.
- ~~3.2.~~ A building with a permanently installed, on-site renewable energy system.
- ~~4.3.~~ A building with a *Total Solar Resource Fraction (TSRF)* of less than 80 percent, as documented and submitted by the *registered design professional* and *approved* by the *building official*.
- ~~5.4.~~ A building where the *registered design professional* submits documentation identifying that the *solar-ready zone* required by Section 3111.4.3 is infeasible because of structural configuration, extensive rooftop equipment, skylights, *vegetative roof* areas, other obstructions, or other unique design limitations, and where such documentation is *approved*.

Section 3111.4.3 **3111.4.3 Solar-ready zone.** A *solar-ready zone* shall be located on ~~the roof of buildings~~ building roof planes that are oriented between 110 degrees and 270 degrees of true north ~~or have and on~~ low slope roofs (roof slope < 2:12).

Chapter 34 Existing Buildings

Section 3403.6.6 **3403.6.6 Additions.** Provisions for new construction shall apply to *additions*. An *addition* that affects the accessibility to, or contains an area of, ~~a~~ *primary function* shall comply with the requirements in Section 3403.6.7.1.

Section 3405.6.5.3 **3405.6.5.3 Seismic loads (seismic force-resisting system).** Where a *change of occupancy* results in a building being assigned to a higher *risk category*, or where the change is from a Group S or Group U occupancy to any occupancy other than Group S or Group U, the ~~entire structure~~ building shall satisfy the requirements of Section 1613 for the new *risk category* using full seismic forces.

Exceptions:

1. ~~Specific seismic detailing requirements of Section 1613 for a new structure shall not be required to be met where the seismic performance is shown to be equivalent to that of a new structure. A demonstration of equivalence shall consider the regularity, overstrength, redundancy and ductility of the structure. Where the area of the new occupancy is less than 10 percent of the building area, the occupancy is not changing from a Group S or Group U occupancy, and the new occupancy is not assigned to Risk Category IV, compliance with this section is not required.~~
2. Where a *change of use* results in a building being reclassified from *Risk Category* I or II to *Risk Category* III and the seismic coefficient, *SDS*, is less than 0.33, compliance with this section is not required.
3. Where the change is from a Group S or Group U occupancy and there is no change of *risk category*, use of reduced seismic forces shall be permitted.
