

Addendum to 2021 Portland Group MS4 Permit

Category I Permit Modification Pursuant to OAR 340-045-0055

Permit No. 101314, a Phase I Municipal Separate Storm Sewer (MS4) NPDES permit, was issued on September 15, 2021 to the co-permittees comprising the City of Portland and the Port of Portland (the Portland Group), effective October 1, 2021. Per OAR [340-045-0055](#), DEQ may issue minor corrections of typographical and other minor errors without initiating the formal processes or procedures normally employed in application for and issuance of NPDES permits. This addendum corrects one such minor error, as follows:

Wasteload Allocation Reference Page

After the permit was issued, it was revealed that the Wasteload Allocation (WLA) reference page was missing the listing of a TMDL. The omitted reference was to the Tualatin Basin TMDL (2012), available for reference at <https://www.oregon.gov/deq/wq/tmdls/Pages/TMDLs-Willamette-Basin.aspx>. The Tualatin Basin TMDL was properly referenced both on the cover sheet and in the Permit Evaluation Report, but its WLAs did not appear on the reference page. This TMDL is relevant to the permit and should have been listed because the co-permittees' jurisdiction extends into the Tualatin Basin. WLAs under this TMDL that are relevant to the permit and should have been listed include TSS (as a surrogate for other parameters), bacteria, and phosphorous.

Schedule B.4 List

Schedule B.4 (*MS4 Renewal Application Package*) of the permit includes a list of requirements (a) through (h). At the top of the following page, however, there is an (i) just above the section title for for Schedule B.5 (*Submissions*). This item (i) was an erroneous addition and formatting error, not a requirement inadvertently omitted. There was no intent to include an additional requirement as item (i).
