# Rock business is a blast

By Alan Gustafson  
Of the Statesman-Journal

PHILOMATH — George Neuman's favorite kind of rock lacks a beat, but he sure does dig it.

He excavates and sells almost 90,000 tons of rock a year at two quarries near Philomath.

Standing on the rim of a craggy pit, Neuman saw beauty in the boulders below.

"The gray rock is the good rock," he said. "It's a member of the granite family, and it's a hard, durable rock."

Durability is a prized quality in the rock business. People who build roads and buildings pay Neuman good money, ranging from \$4.25 to \$5.50 a yard, for various sizes of rocks.

Neuman said he sold up to 70,000 yards of rock a year. That is equivalent to about 1.9 million cubic feet, or almost 90,000 tons.

Anyway you measure it, "That's a lot of rock," he said.

And it takes a lot of blasting, a process called drilling and shooting, to unearth new supplies of rock. This consists of drilling a hole in the quarry floor, as deep as 50 feet, and packing dynamite charges in the opening. The explosions excavate jagged rocks, which then are smashed into assorted sizes by a motor-driven machine.

Neuman said the blasting work wasn't particularly dangerous.

"No more than walking down the street," he said.

A former logger, Neuman, 61, worked for another rock-selling business before starting his own operation in 1967.

"Everything was so high-priced, I figured why not do it myself," he said. "And I happened to know where the rock was — the good rock."

Neuman Quarry and Excavating is a family business. George and his wife, Betty, have 10 children, their ages ranging from 35 to 22. Five of their six sons work in the quarries.

It's a solid business, too.

"There's always a demand for rock," Neuman said. "Rock is necessary in any construction you do. Roads, revetment — you name it, it's there. Without rock, people wouldn't be driving all their fancy cars on nice roads."

## People

**Name:** George Neuman.

**Address:** Philomath.

**Born:** May 12, 1926.

**Occupation:** Quarry owner.

**Family:** His wife, Betty, and the couple's 10 children: Marjorie, 35; Tony, 34; David, 33; Jerry, 32; Susan, 30; Tim, 29; Paul, 28; Peter, 27; Jacqueline, 23; and Mary, 22.

**Hobbies:** Elk and deer hunting.

**Quote:** "I guess my real hobby is work. That's what my wife says anyway."

People stories are profiles of ordinary people who symbolize the variety and attraction of life in Oregon — and specifically in the Mid-Willamette Valley and coast areas. If you know people who would make good People story subjects, please mail their names and descriptions to People Editor, The Statesman-Journal, P.O. Box 13009, Salem 97309.

Not everyone appreciates a quarry, however. Neighbors of one of Neuman's rock pits have complained about noise and dust. Their protests triggered a protracted legal battle that led to restrictions being placed on his crushing and hauling operations.

From June 1 until Nov. 1, Neuman said, no crushing can be done at the site. Weekend hauling operations also are banned.

Neuman bristled at the restrictions, saying they are symbolic of the type of land-use controls that have given Oregon an anti-business image.

"I feel like until we get rid of the Land Conservation and Development Commission, this state is going to keep going under," he said.

From his perspective, the deep pit will not be a permanent scar on the land.

"It can be reclaimed, someday," he said. "Maybe it will never be exactly the way it was, but it can be somewhat restored."

Meanwhile, more rocks will be mined.

What is the life expectancy of this quarry?

Neuman shrugged, looked into the pit and said he didn't know.

Then he smiled and said, "I'm not going to run out of rock very soon."

STATE ARTICLE CONCERNS: OREGON

AFTER FIVE-YEARS

# Court OKs Morse Bros. operation

CORVALLIS—Morse Brothers Inc. has won a battle to expand its gravel-extraction operation near the Willamette river, southeast of Corvallis.

"What's happened is we've just been harrassed for five years and finally justice has been served," says Frank Morse, president and one of the principals of the company.

After a five-year battle, the Oregon Court of Appeals settled

the matter last week by dismissing an appeal by Friends of Benton County to block the gravel operation's expansion into farmland. The local group charged the expansion would violate state goals that seek to preserve farmland, reports the Corvallis Gazette-Times.

But the court dismissed the appeal, saying the group had no case because the state Land Conservation and Development

Commission approved the county's comprehensive land-use plan. One of the areas the state commission considers before granting its approval is the plan's compliance with the state goals for preserving farmland.

### Several options

The court's decision could be appealed to the state Supreme Court within 30 days, or Friends of Benton County could ask the Court of Appeals to review its decision. Either of those courts could refuse to hear or review the case. Ben Fetherston, the attorney for the local group, could not be reached to comment on whether there are further plans to appeal the case.

Morse Brothers will start to use the new gravel site right away, says Frank Morse.

"It now gives us the freedom to do our long-range planning and make our operation efficient. It's hard to believe we could be harrassed for that length of time," he says about the court battles.

The company will file a petition with the court to recover attorney's fees in the case, says Edward F. Schultz, attorney for Morse Brothers. As of Monday, he had no idea how much that would be. He says his law firm's bookkeeper would have to go over the accounts and figure the total sum.
