It is of the greatest importance to have a complete history of the well. Use this form in reporting the history of all important operations at the well, together with the dates thereof, prior to the first production. Include in your report such information as size of hole drilled to cementing or landing depth of casings, number of sacks of cement used in the plugging, number of sacks or number of feet of cement drilled out of casing, depth at which cement plugs started, and depth at which hard cement encountered. If the well was dynamited, give date, size, position and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position and results of pumping or bailing.

Date

3/11/57 Set 213' 8" casing in 10" hole, cemented from top to bottom using 25 sacks of cement.

3/17/57 Encountered sandy formation that made some water, salty, from 402' to 419'.

4/20/57 Set 807' 6" casing making tight formation seat.

5/12/57 Ceased drilling, having encountered no oil or gas signs and very little water, having to put in water with which to drill after setting 6" casing.

5/16/57 Started plugging, after pulling 6" casing, according to plan submitted to State Dept. of Geology and Mineral Industries.

5/22/57 Completed well
