

Beaverton School District

Funded amount \$425,000

Our 21CCLC programs have been a leading example of how to partner with communities to better meet needs of families/students in a large complex District. The current 21CCLC focuses on equity and community partnerships and we must continue to learn from and expand the methods employed at McKay and Greenway Elementary Schools. Our experience and expertise partnering with Metropolitan Family Service (MFS) to offer 21CCLC will allow us to address the immense needs of students/families, and work with new partners, strategies and curricula to help build on students' assets and strengths. Our vision for our enhanced 21CCLC is to center the community and their cultural knowledge, social/emotional learning and academic excellence. ODE 21CCLC goals - equitable programming, academic enrichment, youth development, and family engagement - align with ours and with new/enhanced activities related to each goal, including intentional focus on mental health/wellbeing and literacy.

Expected outcomes for focal students (low/non attenders and students who will be identified through BSD's Early Warning Report identifying a range of potential risk factors) include improved Math/Reading skills and improved experience of connection and care from BSD, and for families, improved understanding of how to support their students' academic goals.
