#### Background

State-owned forests are sustainably managed to provide environmental, social and economic benefits to all Oregonians. In October of 2020, the Board of Forestry (BOF) gave direction to the State Forests Division to continue the development of a draft Habitat Conservation Plan (HCP) and a Forest Management Plan (FMP) for Western Oregon State Forests. The Administrative Draft HCP entered the NEPA process in March 2021. Now, the State Forests Division is developing the FMP and Implementation Plans (IPs). The State Forests Division determined that the best way to carry out this work is in a parallel process, running two separate projects. The existing HCP project team will continue with the NEPA process, and a new project has been initiated to develop the FMP and IPs. The project teams will coordinate closely throughout the project lifecycle to ensure alignment and consistency in management goals, objectives and strategies. As ODF updates the FMP and continues the HCP development process, a key goal of ODF is to provide information and engage in dialogue with all Oregonians who want to weigh in on these important planning efforts.

#### Meeting Purpose

- Provide an update on the Forest Management Plan (FMP) & regional Implementation Plan (IP) Project and describe the engagement process for this effort.
- Provide an update on the Western Oregon State Forests Administrative Draft HCP.
- Provide an update on the HCP NEPA process.
