

# Criteria Concepts and Workplan

Jenna Trentadue-ODF-National Fire Plan Coordinator

# High Level Overview of Workplan

1.) Identify words that need a definition

2.) Tools to identify? (Existing)

3.) Which of these datasets work best for Oregon?  
(amend a dataset to fit needs/criteria?)

4.) Make criteria definitions based on chosen tools  
and/ amended datasets

5.) Ground truthing/realistic/ implementable?

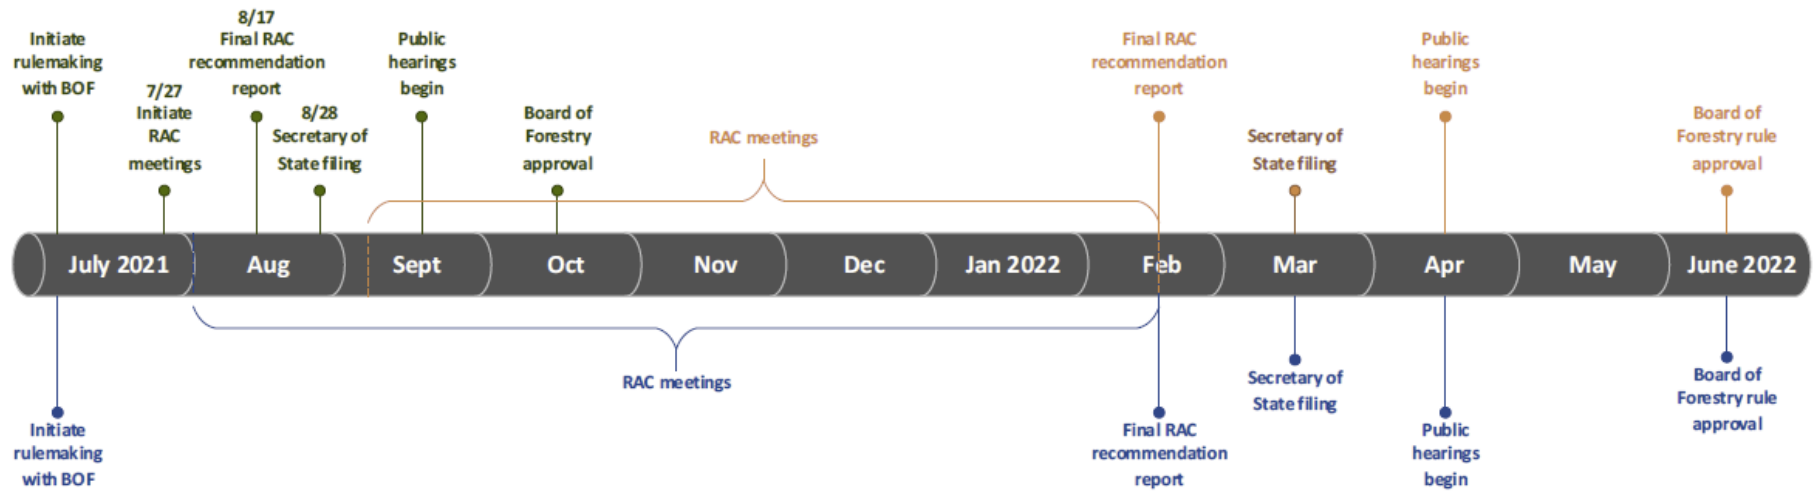

**WUI Definition: “That geographical area where structures and other human development meets or intermingles with wildland or vegetative fuels”**

Possible word Definitions	Example Identification Tools	Questions to ponder for mapping purposes
<b>Geographical Area</b>	Federal Geographical areas and boundaries	What existing geographical features or boundaries would be appropriate/useful?
<b>Structures</b>	Microsoft Office Building Footprint/DOGAMI Building Footprints	Do this layer need refinement and if so where could we find data that would offer that refinement that is already existing?
<b>Human Development</b>	DLCD Land Use Planning Zones Infrastructure Layers in current QWRA	Beyond Structures what would we include in the category that could be mappable and in existing datasets?
<b>Meets</b>	Silvis Dataset/Federal Register	Would places such as Forest Park and Mt Tabor be included?
<b>Intermingle</b>	Silvis Dataset/Federal Register	Would we be including Interface, Intermix, Occluded in the definition?
<b>Wildland Fuels</b>	Landfire Remap (2016)	What things would we want to consider Wildland Fuels?
<b>Vegetative Fuels</b>	Landfire Remap (2016)	What things would we want to consider Vegetative Fuels?

## Oregon Department of Forestry Wildfire Rulemaking

green = WUI definition, orange = WUI boundary criteria, blue = wildfire risk mapping

## Homework:

Are these all the words that will need to be defined?

What existing tools may help with these definitions that we haven't taken into account?

What are some specific concerns or suggestions that you feel need to be included in future meetings to address WUI boundary Criteria?
