Oral Health Provider Types Proposed to be Tied to Time and Distance Standards

Oral Health Provider Types Proposed to be Tied to Time and Distance Standards

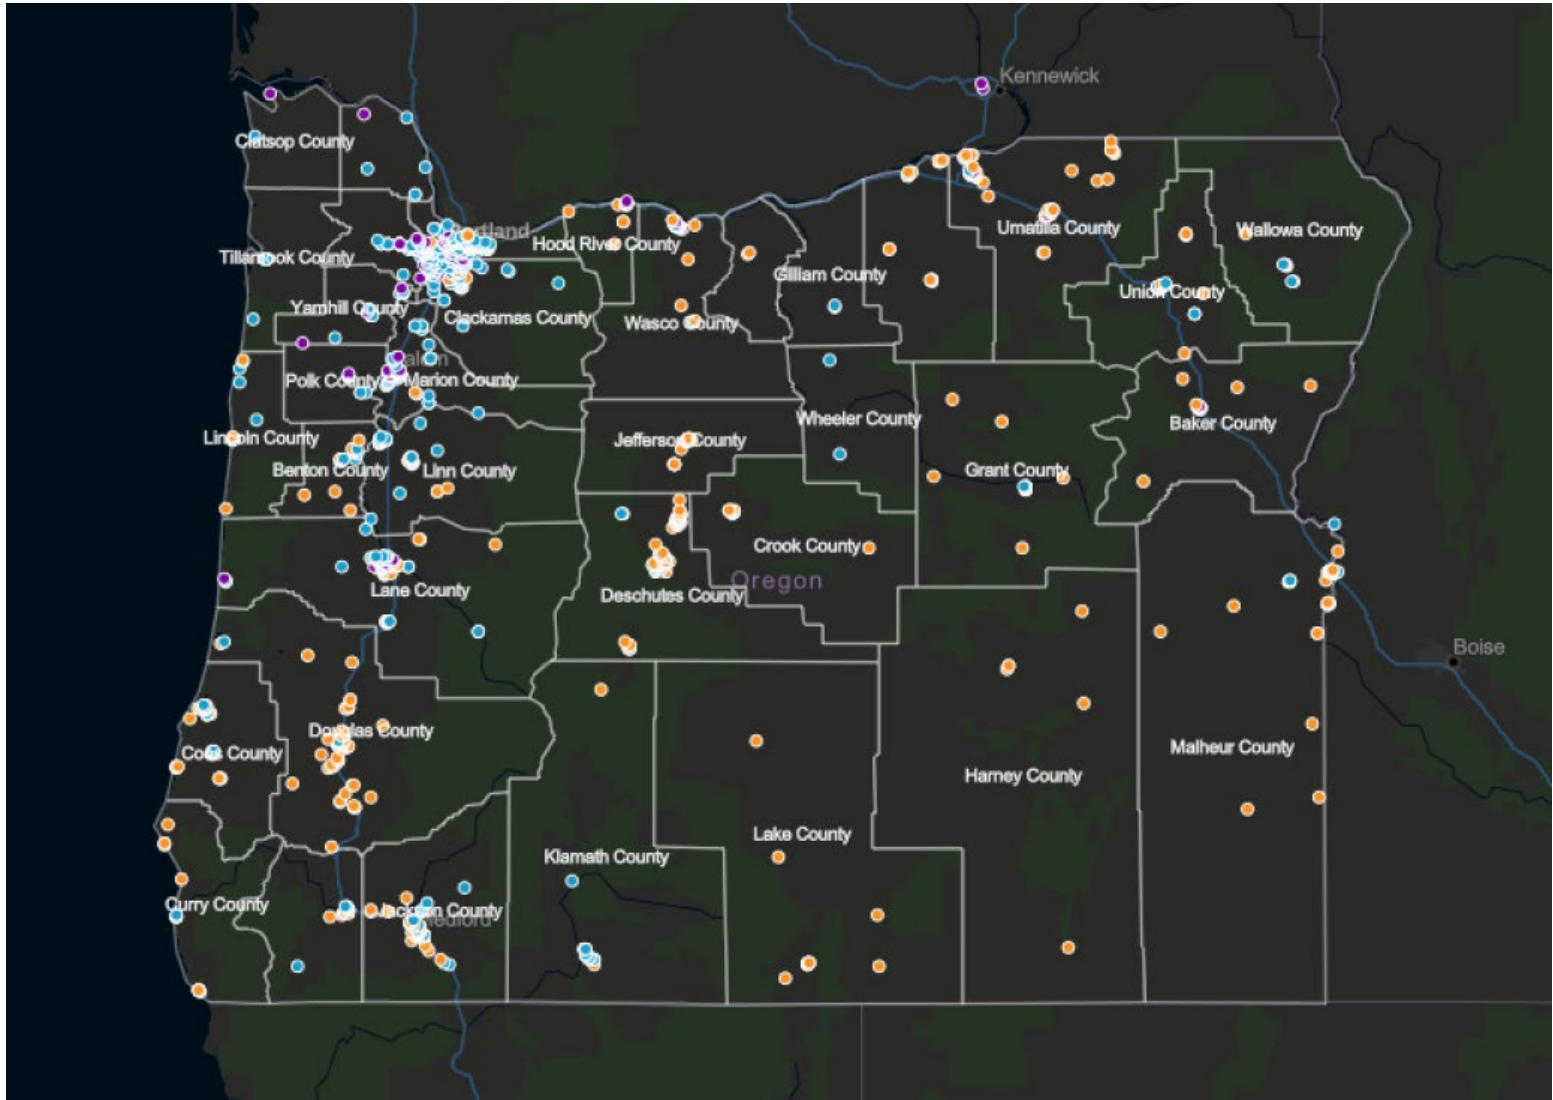

Primary Care Dentist*	Dental Hygienist	Denturist	Endodontist
Oral & Maxillofacial Surgeon	Orthodontist	Periodontist	Prosthodontist

Questions for the Group:

- Do we need to include oral & maxillofacial pathologists and oral & maxillofacial radiologists as standalone categories in the standards?
- What do we need to take into consideration about Prosthodontists & Denturists? E.g. demand for prosthodontics over denturists and clinical distinctions between the specialties.
- Are we capturing the right providers under “Primary Care Dentist”? (i.e. Dentist, Public Health Dentist, General Practice Dentist, Pediatric Dentist)

Time and Distance: Example Standards for Oral Health Provider Types
