

Community Partner Outreach Program (CPOP)
External Relations Division
Oregon Health Authority
August 2023

This document includes the list of CPOP grantees, volunteer organizations (not funded), and a summary of two health equity-centered projects to support healthcare system navigation and enhance community engagement by Community Partners to help OHP members to access care.

Healthcare System Navigation Grant (HSN)

In the current 2023-25 biennium, CPOP has grant agreements with 30 Community Partners across the state. The HSN grant objective is to conduct effective community-based outreach and engagement to inform all Oregonians across the state of the new eligibility criteria for the Oregon Health Plan and methods of applying and helping them to access the care they may need.

Healthier Oregon Grant

In the current 2023-25 biennium, CPOP has grant agreements with 25 Community Partners across the state; we anticipate increasing the number of grantees as we receive additional funding to do this work. The Healthier Oregon grant aims to conduct strategic multicultural-multilingual community outreach and engagement. Through these efforts, Community Partners enroll and inform newly enrolled Healthier Oregon members about their new benefits and support them in navigating the healthcare system.

Volunteer Organizations

In the current 2023-25 biennium, CPOP has volunteer agreements with 266 Community Partners across the state. Our volunteer organizations include large healthcare systems such as hospitals, local clinics, Public Health Departments, Schools, private medical practices, insurance agents, non-profit organizations, faith-based organizations, providers (medical, mental, and behavioral health), Federally Qualified Health Centers (FQHCs), etc. Like our grantees, volunteer organizations conduct community outreach and engagement activities to ensure Oregonians have access to healthcare.

Health Equity-Centered Projects

Community Health Worker (CHW) Training

CPOP's Community Health Worker Training prepares participants to play various roles, from connecting people to existing services and assisting with medical utilization (healthcare system navigation) to organizing communities to identify and address their most pressing health issues. Our training has been approved by the OHA's Traditional Health Worker (THW) Commission and satisfies the requirements for CHWs to be on the OHA's THW Registry.

CHWs have historically provided person and community-centered care by bridging communities and the health systems that serve them, increasing the appropriate use of care by:

1. Connecting people with health systems
2. Advocating for health plan members
3. Supporting adherence to care and treatment
4. Empowering individuals to be agents in improving their health
5. Connection to community resources and local support networks

This training and our Health Ambassadors program are designed to build capacity within our community partner network and the broader community. These programs empower participants to not only facilitate access and utilization of health coverage but to drive change within their communities in a culturally and linguistically responsive manner to improve health outcomes. CPOP uses a community-centered approach to capacity building for both programs, including popular education strategies.

Community Health Ambassadors – Embajadores de Salud (HAES)

Our HAES Project has been designed and developed to empower communities by embracing peer education methodology to support, promote, and enhance health education among community members. HAES focuses on teaching or sharing health information, values and behavior in educating others who may share similar social backgrounds or life experiences.

Rather than health professionals educating community members, the purpose of HAES is that community members are in the best position to encourage healthy behavior toward each other.

Our Health Ambassador network is comprised of community members already engaged in community work through our Community Partners; these individuals are:

1. Trusted leaders and connectors in their community
2. Volunteers with community organizations, programs, schools, faith organizations, etc.
3. Have a passion for community service and informing their community about available programs in their region
4. Increases community reach to diverse and underserved communities
5. Provides training to community partners and community members

Additionally, our network integrates multicultural values that create spaces to heal and embrace intergenerational, culturally rooted values around health and what it means to be healthy.

If you have any questions, please get in touch with Oliver Vera at Oliver.Vera@oha.oregon.gov.

Healthcare System Navigation		
Organization	County(ies)	Population(s) served
Afghan Support Network	Statewide	Refugees, low-income, homeless-houseless, non-English speakers, immigrants
