² Abortion estimates are based on reports for Oregon residents whether occurring in Oregon or another state. For years prior to 1985 (and in 1986-1987) abortion estimates were based on Oregon occurrences only, but included abortions obtained by out-of-state residents. Because some neighboring states do not report abortions to the state of residence (especially California), this results in minimal estimates for both abortions and pregnancies.

NA = Not Available

All rates are per 1,000 females.

– Quantity is zero.
¹ All rates per 1,000 females.
² Total includes eight pregnancies where county of residence was unknown.
 § Pregnancy rate is significantly different from the state.
 * Detailed reporting of small numbers may breach confidentiality.

WARNING: Rates based on less than five events are unreliable.
 NOTE: Includes births and reported abortions including those obtained out-of-state by Oregon residents. Because some states (e.g., California) do not record data on residence for abortion patients, not all out-of-state abortions are included.

— Quantity is zero.

¹ All rates per 1,000 females.

² Total includes three abortions where county of residence was unknown.

§ Abortion rate is significantly different from the state.

* Detailed reporting of small numbers may breach confidentiality.

WARNING: Rates based on less than five events are unreliable.

NOTE: Includes abortions obtained out-of-state by Oregon residents. Because some states (e.g., California) do not record data on residence for abortion patients, not all out-of-state abortions are included.

– Quantity is zero.

¹ Less than five prenatal visits or care began in the third trimester.² Rates per 1,000 females 15-19 years of age.³ Rates per 1,000 births to 15-19 year olds.

§ Rate is significantly different from the state rate.

* Detailed reporting of small numbers may breach confidentiality.

WARNING: Rates based on less than five events are unreliable.

NOTE: Rates and percentages are calculated excluding missing and unknown values.
