NOTE: Totals in the table include reports for attempters 18 or older, out-of-state residents, ideators treated by Hospital staff, and duplicate reports. Therefore, these figures are higher than the final numbers reported elsewhere in this chapter. Included in the totals, but not shown, are the number of reports from hospitals that have since closed.

** Cottage Grove Hospital was closed during most of 1999. It reopened in December of 1999 but no attempts were reported.
