

**Table 2.** Procedures, findings, and treatment results for pediatric patients by vaccination status for 2003-2004.

Procedure, Findings, and Treatment	Number (% for column) of Patients by Vaccination Status			Total (N=138)
	Vaccinated (n=24)	Unvaccinated (n=101)	Unknown (n=13)	
<b>Procedure</b>				
Chest x-ray	23 (96)	75 (74)	13 (100)	111 (80)
Mechanical ventilation	1 (4)	10 (10)	2 (15)	13 (9)
ECMO or "on bypass"	0	1 (1)	0	1 (1)
CT scan or MRI of head	1 (4)	12 (12)	0	13 (9)
<b>Findings</b>				
One or more pre-existing conditions	17 (71)	35 (35)	5 (39)	57 (41)
Invasive bacterial infection	0	3* (3)	0	3 (2)
Vaccinated in previous years	9 (38)	4 (4)	0	13 (9)
<b>Treatment</b>				
Received antiviral medication	7 (29)	14 (14)	4 (25)	25 (18)
Admitted to ICU	3 (13)	22 (22)	3 (23)	28 (20)

\* The three patients with an invasive bacterial infection included 1 patient with methicillin-resistant *staphylococcus aureus*, 1 patient with *bacillus cereus*, and 1 patient with *viridians streptococcus*.
