HIV Care and Treatment									
CY2020 Service Category Performance Measure (PM) Outcomes– Across all Service Providers									
Funded HRSA Service Category ¹ requiring a PM based on Client utilization Threshold		Service Category Utilization In CY2020			Performance Measure	CY2020 Outcome			Goal Met?
1a	ADAP: One Pharmacy dispensing payment for medication (insured)	N	1802	47%	Viral Suppression (Goal 90%)	N	1546	96%	Yes
		D	3805			D	1605		
1b	ADAP: One Full cost payment for CA-funded medication (uninsured)	N	895	24%	Viral Suppression (Goal 90%)	N	767	96%	Yes
		D	3805			D	802		
2.	Case Management (non- medical)	N	1387	99%	Viral Suppression (Goal 90%)	N	1100	94%	Yes
		D	1404			D	1171		
3.	Medical Case Management	N	1130	80%	MCM Care Plan (Goal 90%)	N	232	85%	No
		D	1404			D	274		
4.	Emergency Financial Assistance	N	283	20%	Viral Suppression (Goal 90%)	N	415	93%	Yes
		D	1404			D	447		
4.	COVID Emergency Financial Assistance	N	285	20%	Viral Suppression (Goal 90%)n	N	241	93%	Yes
		D	1404			D	290		
5.	Food Banks / Home Delivered Meals	N	701	50%	Viral Suppression (Goal 90%)	N	545	94%	Yes
		D	1404			D	582		
6.	Housing	N	176	13%	Stable Housing (Goal 95%)	N	135	79%	No
		D	1404			D	171		
7.	Medical Transportation	N	329	23%	In Care / Retained in Care (Goal 90%)	N	292	92%	Yes
		D	1404			D	316		

COVID EFA Services include: Food, Housing, Medical Transportation, OTC, Other, and Utilities

¹ Service Category utilization thresholds for Performance Measures (PM) are determined by the percentage of RWHAP eligible clients receiving at least one unit of service for a RWHAP-funded service category (regardless of funding source), as follows:
 >=50% usage=2 PM's; >15% to <50% usage=1 PM; <=15% usage =0 PM
 Source: [PCN #15-02 Clinical Quality Management Policy](#)

HIV Care and Treatment CY 2020 Service Category Unmet Performance Measure Goals

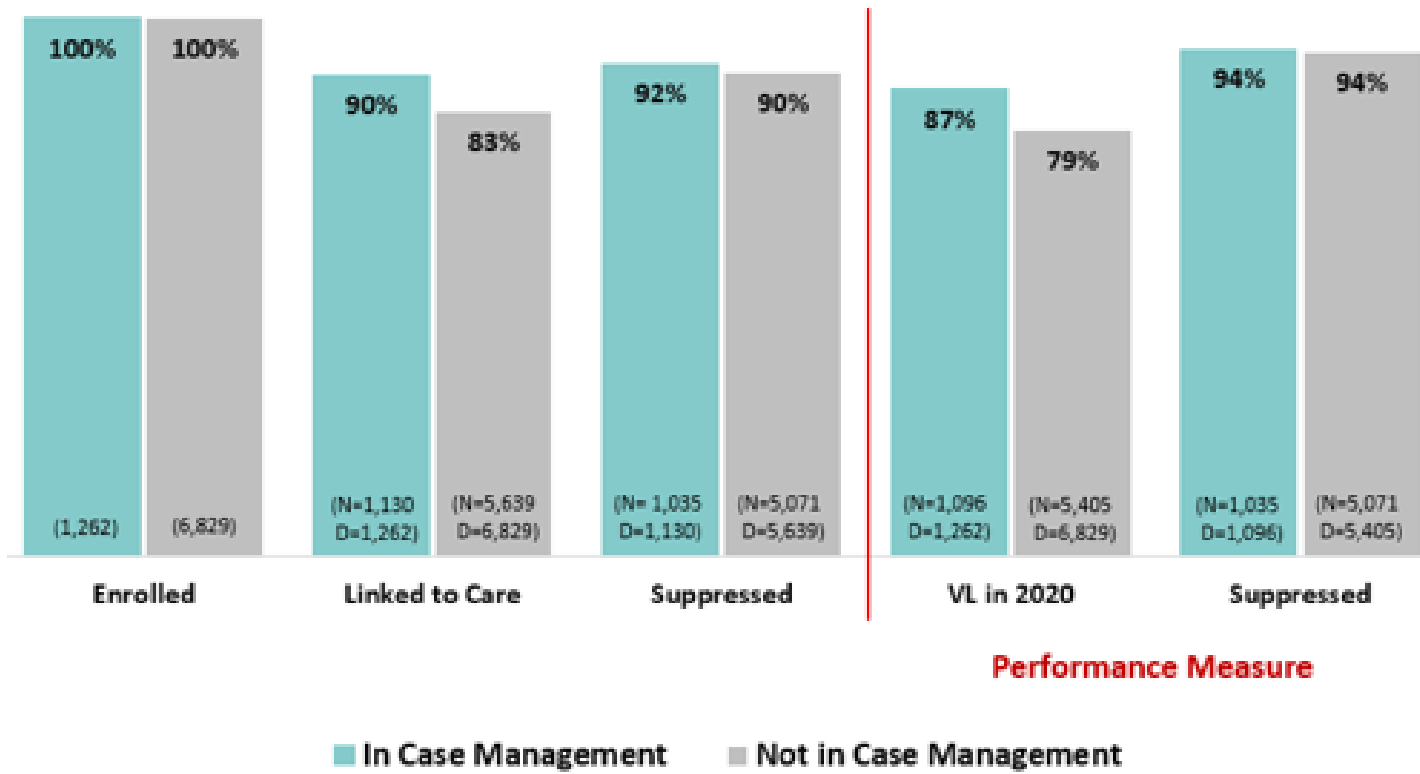

All Part B funded HRSA service category performance measures were met except for the following three HIV Case Management service categories:

- Of the 99% of clients who received a Case Management Service Category:
 - 94% had Stable Housing at the last CW entry in CY (Goal=95%)
 - 6% improvement from CY2019
- Of the 13% of clients who received a Housing Service Category:
 - 79% had Stable Housing at the last CW entry in CY (Goal=95%)
 - 5% decrease from CY2019
- Of the 80% of clients who received a Medical Case Management Service Category:
 - 85% had a MCM Care Plan service in each six-month period they were a high MCM Acuity
 - 24% were high medical acuity at some point in the CY (a 3% increase from CY2019)
 - 7% improvement from CY2019
 - 87% received HIV medical care, a 3% decrease from CY2019

HIV Care and Treatment
CY 2020 HIV Care Continuum outcomes

Case Management HIV care continuum, Oregon 2020

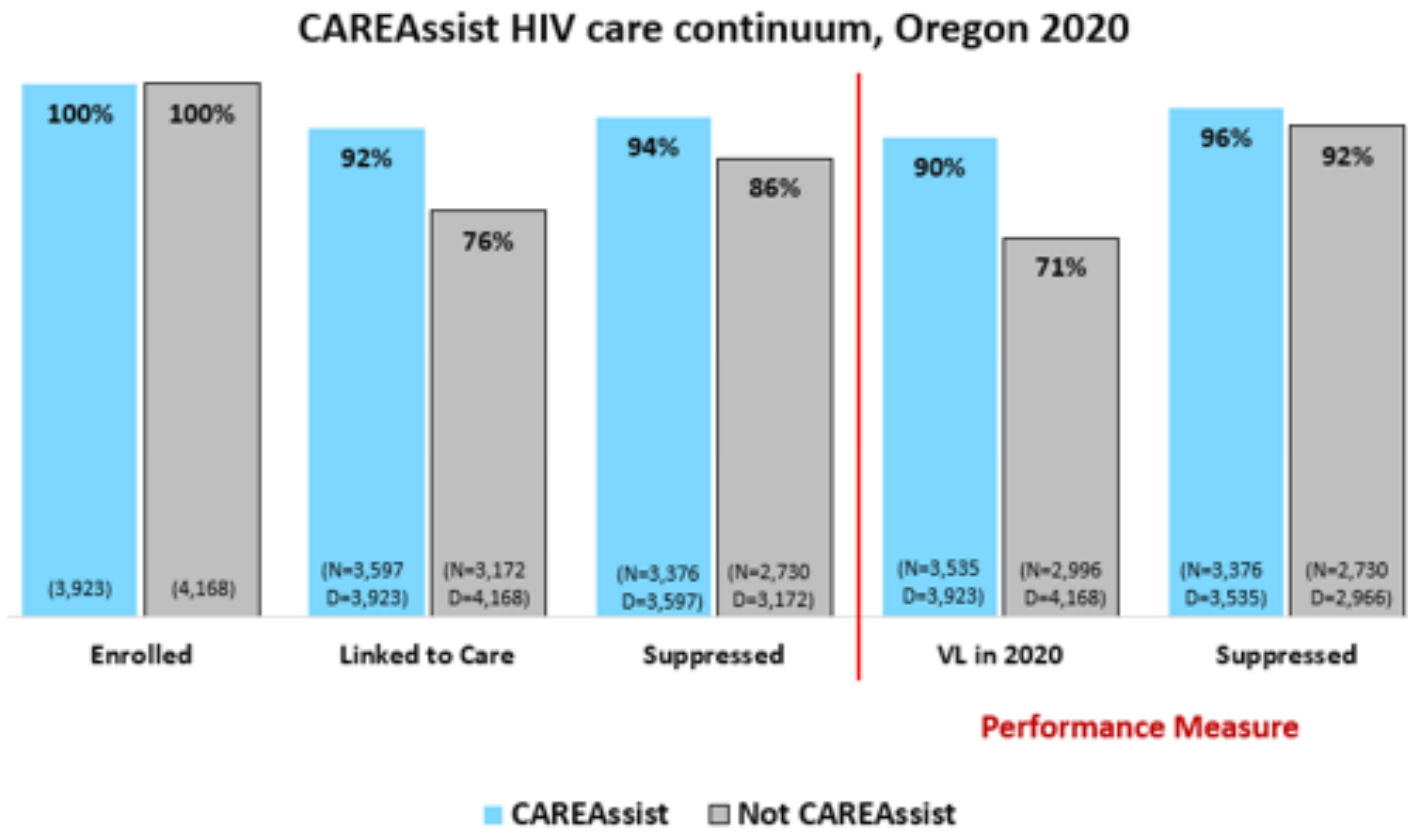

HIV Case Management Care Continuum Outcomes

2020 compared to 2019:

- People living with HIV (PLWH) and clients enrolled in Part B Case Management (CM) saw a decrease in getting linked to care (3% and 5% respectively) in 2020 compared to 2019, as well as a decrease of 1% for both groups with then being virally suppressed.

2020:

- 7% more clients enrolled in CM were engaged in medical care (“In Care”) (90%) than PLWH in the Part B HIV Case Management service area (83%).
- Of those PLWH “In Care”, Part B HIV Case Management clients have a 2% higher viral suppression rate (92%) than PLWH in the Oregon non-metro Part B service area (90%).

CAREAssist HIV Care Continuum Outcomes

2020 compared to 2019:

- 2020 had a higher percentage (19%) of CA clients who were virally suppressed vs. PLWH who are not virally suppressed.
- PLWH and clients enrolled in CAREAssist (CA) saw a decrease in getting linked to care (3% and 7% respectively) in 2020 compared to 2019, as well as a decrease of 1% for CA clients then being virally suppressed; however, the PLWH actually had a 2% increase in being virally suppressed once linked to care, compared to the year prior.

2020:

- 16% more PLWH enrolled in CAREAssist are engaged in medical care (“In Care”) (92%) than PLWH in Oregon not enrolled in CAREAssist (76%).
- Of those PLWH “In Care”, CAREAssist clients have a 8% higher viral suppression rate (94%) than PLWH in Oregon not in CAREAssist (86%).
