

Overdose-Related Services & Projects Summary by Oregon County

Updated April 2024

Document Overview

This document provides county-specific snapshots of overdose-related services and projects across Oregon. This information supports Oregon Health Authority (OHA) overdose prevention funding decisions and county-level public health agencies' planning and intervention efforts.

Information in this document was updated April 2024 and will be updated annually to reflect changes in Oregon counties. If you have any questions or edits to this document, please contact [Courtney Fultineer](#) or [Soomin Shin](#).

Statewide Public Campaigns

Heal Safely Campaign

Prescription opioids come with risks and serious side effects and should be a last resort when managing pain. [Heal Safely](#) offers communities throughout Oregon

and Indian Country access to information and resources that support safer healing after injury or surgery. Health Safely instills that everyone deserves safe, effective options that will help them rest, recover and get back to daily life.

Reverse Overdose Oregon Campaign

[Reverse Overdose Oregon](#) is a statewide campaign that gives employers the tools to train their teams on how to use naloxone—the life-saving medication that reverses opioid overdose—as part of workplace safety and preparedness. By providing naloxone training

and resources to employers, Oregon Health Authority is expanding the pool of first responders to overdose and empowering everyday people to save the lives of coworkers and community members who accidentally overdose from prescription painkillers or illicit opioids.

Statewide Resources

Save Lives Oregon Resource Hub

State Leads: [Ashley Jones](#) and [Jude Leahy](#)

[Save Lives Oregon](#) began in 2020, when the COVID-19 pandemic heightened the overdose crisis and left many families, neighborhoods and communities struggling. In response, a resource hub was launched to

provide more life-saving supplies such as naloxone to organizations and tribal communities on the front lines of harm reduction. With continued support and a growing understanding of the power of harm reduction to save lives, Save Lives Oregon is reducing drug-related stigma and increasing access to programs that support the health and dignity of people who use drugs

Measure 110 Behavioral Health Resource Network

In November 2020, Oregon voters passed by referendum [Measure 110](#), or the Drug Addiction Treatment and Recovery Act. As a part of Measure 110, Behavioral Health Resource Networks (BHRNs) were established in Senate Bill 755. A BHRN is an entity or group of entities working together to provide substance use services in Oregon. They serve people with substance use disorders or harmful substance use. At least one BHRN must be established in every county and Tribal area. Services provided by the BHRNs must be free of charge to the client. BHRNs must bill insurance for services where possible before using grant funds. Each BHRN must provide trauma-informed, culturally specific and linguistically responsive services.

Services include but are not limited to:

- Screening for health and social service needs.
- Screening and referral for substance use disorder.
- Access to an individualized intervention plan.
- Case management.
- Low-barrier substance use disorder treatment.
- Harm reduction services.
- Peer-supported services.
- Housing.
- Mobile and virtual outreach.
- Referral to appropriate outside services.

Visit the [Measure 110 Behavioral Health Resource Network Dashboard](#) to view funding progress by county. Use the [Measure 110 Treatment and Recovery Services Dashboard](#) to find local substance use disorder treatment and recovery services.

Removal of X-Waiver Requirement Update

State Lead: [John Mcilveen](#)

Prior to 2023, a special Drug Enforcement Agency (DEA)-approved [X-waiver](#) certification from Substance Abuse Mental Health Services Administration ([SAMHSA](#)) was required for clinician to prescribe buprenorphine. The U.S. Department of Health and Human Services (HHS) moved to [repeal X-waiver requirements](#) and as part of the [omnibus bill](#) to expand universal access to medications for opioid use disorder (MOUD) treatment. [Effective now](#), any clinician with a current DEA registration, that includes Schedule III authority, may prescribe buprenorphine for OUD.

There are no limits on the number of patients a prescriber may treat. However, the simultaneously passed Medication and Access and Training Expansion Act, requires all clinicians applying for or renewing their DEA license to complete a one-time, 8- hour training on treating and managing patients with SUD. Certain providers, such as those board certified in addiction medicine or recent graduates with applicable curriculum, will not have to complete any additional training. This requirement has been effective since June 2023.

Services & Projects Overview

Table 1 provides a brief overview of the 8 types of overdose-related services and projects and provides links to places in the document where more information is available.

Table 1: Services & Projects Overview

Service/Program	Link to page with more details
<p>Syringe Service Programs (SSPs)</p> <ul style="list-style-type: none"> ▶ SSPs are community-based organizations providing a variety of services including free sterile needles and syringes, safe disposal areas, naloxone distribution and overdose education, and access to prevention services such as HIV and hepatitis C testing. This section details the counties and agencies providing these services. 	<p>Page 8</p>
<p>Overdose Detection and Mapping Application Program (ODMAP)</p> <ul style="list-style-type: none"> ▶ ODMAP provides near real-time suspected overdose surveillance data across jurisdictions to support public safety and public health efforts to mobilize an immediate response to a sudden increase, or spike in overdose events. This section details the counties and agencies participating in this data sharing system. 	<p>Page 12</p>
<p>Peer Recovery Initiated in Medical Establishments / + Infectious Disease Testing and Linkage to Care (PRIME+)</p> <ul style="list-style-type: none"> ▶ The PRIME+ Peer Program connects Peer Support Specialists in 24 of 36 Oregon counties with people who are at risk of or receiving treatment for overdose, infection, or other health issues related to substance use. This section details the counties, agencies, and site leads involved in the PRIME+ program. 	<p>Page 16</p>
<p>Oregon HIV/HCV and Opioid Prevention and Engagement (OR-HOPE)</p> <ul style="list-style-type: none"> ▶ The OR-HOPE study conducts community assessments and developed a peer-based intervention in rural Oregon that includes longitudinal participant surveys and qualitative interviews to understand rural drug use and the impact of the peer intervention. This section details the counties, agencies, and site leads involved in the OR-HOPE study. 	<p>Page 18</p>

Service/Program	Link to page with more details
<p>Peer Assisted Telemedicine for Hepatitis C and Syphilis (PATHS)</p> <ul style="list-style-type: none"> ▶ PATHS is an expansion of an innovative intervention developed by the Oregon HOPE study team and led by Oregon Health and Science University (OHSU). OHA is providing funding through the SAMHSA SOR grant to expand the model statewide. Peer specialists support people who use drugs or are in early recovery in accessing infectious disease testing, hepatitis C pretreatment screening, and linkage to telemedicine HCV treatment clinicians; and support participants in medication initiation and adherence. 	<p>Page 19</p>
<p>Nurture Oregon</p> <ul style="list-style-type: none"> ▶ Nurture Oregon is an integrated care model providing pregnant people who use substances with peer recovery support services, prenatal and postpartum care, substance use and mental health treatment, and service coordination. This section details the counties, agencies, and site leads involved in the Nurture Oregon program. 	<p>Page 20</p>
<p>Opioid Treatment Program (OTP)</p> <ul style="list-style-type: none"> ▶ OTPs provide medications for opioid use disorders (MOUD) for people diagnosed with an OUD. This section details the counties, agencies, and contact information of certified and provisional OTPs in Oregon. 	<p>Page 21</p>
<p>Overdose Prevention Funding</p> <ul style="list-style-type: none"> ▶ Eleven local public health agencies, whose regions cover 23 of 36 counties, are awarded \$1.4 million annually to improve local systems for preventing and responding to opioid and other drug overdoses. This section details the funded agencies and the regional partnerships receiving overdose prevention funding. 	<p>Page 23</p>

Services and Projects Summary by County

The map illustrates summary counts of the 8 available services and projects in each county. To create the summary count, counties were assigned a 1 (service/project present) or a 0 (service/project not present) for each service or project. Table 2 provides additional summarized information about the services and projects in each county. The three public health education campaigns are not included in these counts because they are statewide campaigns.

Syringe Service Programs (SSP)

State Lead: [Judith Leahy](#)

[SSPs](#) are community-based programs for people who inject drugs. SSPs provide a variety of services including free sterile needles and syringes, safe disposal areas, naloxone distribution and overdose education, and access to prevention services such as HIV and hepatitis C testing. Many also provide referrals to services or link with peer programs to offer services. These programs are important in efforts to prevent overdose, HIV and hepatitis C transmission, and hospitalizations for bacterial infections. Agencies compiled on this list are considered to be SSPs which offer syringe distribution and other harm reduction services. The list does not include agencies that are considered Syringe Exchange Programs that follow a one-for-one needle exchange model.

Most agencies listed have SSP hours and location available on the website linked. Agencies with limited information listed are noted using the following symbols:

* Agency provides a schedule but must call for address

~ Address and schedule are not listed but contact information is available to inquire about accessing services.

^ Agency has no public facing information about the SSP. Contact the agency to inquire about accessing services.

Overdose Detection and Mapping Application Program (ODMAP)

State Lead: [Chris Gibson](#)

[ODMAP](#) provides near real-time suspected overdose surveillance data across jurisdictions to support public safety and public health efforts to mobilize an immediate response to a sudden increase, or spike in overdose events. It links first responders and relevant record management systems to a mapping tool to track overdoses to stimulate real-time response and strategic analysis across jurisdictions.

Each agency wishing to participate signs a data sharing agreement which is designed to protect the data within the system. Once signed, they can begin uploading data in real time and access to the ODMAP dashboard, which allows users to view nationwide data. This tool is only available to government (state, local, federal, or tribal) agencies serving the interests of public safety and health. ODMAP is funded by the White House Office of National Drug Control Policy's (ONDCP) High Intensity Drug Trafficking Areas (HIDTA) program and there is no cost to agencies who utilize it.

Peer Recovery Initiated in Medical Establishments + HCV/HIV Testing and Linkage to Care (PRIME+)

State Leads: [Kelsey Smith Payne](#) and [Judith Leahy](#)

[The PRIME+ Program](#) merged and adapted two peer-based models: The Oregon HOPE study (see [page 19](#)) and the Peer Recovery Initiated in Medical Establishments (PRIME) program, originally funded by House Bill 4143 in 2018. PRIME+ was initially piloted in three counties with funds from the CDC. The program has expanded to 24 of 36 Oregon counties and is now funded by the State Opioid Response (SOR) grant from the SAMHSA.

The PRIME+ Program connects Peer Support Specialists with people who are at risk of or who experience overdose, infectious disease, or other health issues related to substance use. PRIME+ peers use a harm reduction approach to engage people at varying stages of behavior change, to provide access to harm reduction supplies; linkage to substance use disorder (SUD) treatment, recovery support, and physical health care; support for infectious disease testing and treatment (particularly hepatitis C); access to community resources to meet basic needs; and emotional and crisis support. Participants connect to PRIME+ in three ways: Community partners (e.g., emergency departments, healthcare and service providers) make referrals, peers conduct direct outreach (street, encampments, etc.), and individuals self-refer or are referred by friends and family. A robust program support infrastructure includes a monthly peer learning collaborative (with continuing education credits), program implementation guides, an active cross-site message board and resource document repository, weekly peer huddles, monthly supervisor meetings, promotional templates, enhanced peer supervision for selected sites, and an annual in-person convergence.

The Oregon HIV/HCV and Opioid Prevention and Engagement (OR-HOPE)

State Lead: [Judith Leahy](#)

The [OR-HOPE study](#) is part of the National Rural Opioids Initiative research consortium funded by the National Institute on Drug Abuse in eight geographically diverse regions across the U.S.: <https://ruralopioidinitiative.org/>

OHA collaborates with Oregon Health and Science University (OHSU), Comagine Health, HIV Alliance, Bay Area First Step, and Oregon Washington Health Network. OR-HOPE included development of a rural peer-based intervention based on needs assessment data, in-depth surveys and interviews with people who use drugs, and analysis of epidemiological data. Peers engage people who use drugs through community and syringe service program settings and provide hepatitis C/HIV testing, harm reduction tools, and linkage to substance use disorder and hepatitis C treatment. The intervention was adapted and expanded by OHA as the PRIME+ peer program.

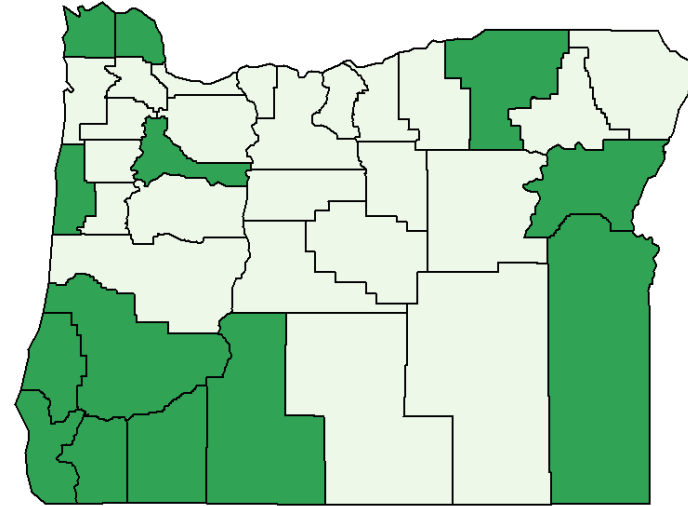

OR-HOPE includes a randomized controlled trial of peer-facilitated telemedicine hepatitis C treatment that includes local peer specialists connecting people to access telemedicine treatment with OHSU, supporting treatment adherence, and addressing barriers. The study demonstrated profoundly higher rates of HCV treatment initiation and cure than referral to local care, and OHA is now funding statewide expansion of the model, called Peer-Assisted Telemedicine for Hepatitis C and Syphilis (PATHS). (See [page 19](#)).

Peer Assisted Telemedicine for Hepatitis C and Syphilis (PATHS)

State Lead: [Judith Leahy](#) and [Kelsey Smith Payne](#)

[PATHS](#) is an expansion of an innovative intervention developed by the Oregon HOPE study team and led by OHSU. OHA is providing funding through the SAMHSA SOR grant to expand the model statewide. Peer specialists support people who use drugs or are in early recovery in accessing infectious disease testing, hepatitis C pretreatment screening, and linkage to telemedicine HCV treatment clinicians, and support participants in medication initiation and adherence. OHSU clinicians with specialty training in working with people who use drugs provide streamlined access to care. The intervention relies on dedicated community-based peer outreach and support, “on-demand” clinical care, and partners positioned to enact systems change. The PATHS expansion includes implementation by PRIME+ peer teams and select opioid treatment programs (OTPs) around the state. The PATHS team provides training, technical assistance, and clinical coordination to peer teams and partners implementing the model. Peers around the state have been trained in PATHS; the table below shows sites that have begun providing PATHS to participants.

Nurture Oregon

State Lead: [Gregory Bledsoe](#)

[Nurture Oregon](#) is an integrated care model providing pregnant people who use substances with peer recovery support services, prenatal and postpartum care, substance use and mental health treatment, and service coordination. The original model (Project Nurture) was piloted in three sites in Portland, Oregon beginning in 2015 and was associated with increased prenatal visits, reduced placement of children in foster care, and cost savings. Oregon Health Authority Behavioral Health Division is building on lessons learned from the pilot to expand and adapt this program for sustainable implementation in rural communities. The expansion project, Nurture Oregon, includes four rural counties (Deschutes, Jackson, Lincoln, and Umatilla counties). Enhanced elements have been incorporated such as regular cross-site training and coordination, trauma-informed mental health counseling, case management, and the opportunity for recovery peers to receive certification to provide doula services. Nurture Oregon includes a collaboration with Oregon Department of Health Services (ODHS) Child Welfare in developing materials to facilitate coordination related to Comprehensive Addiction Recovery Act Plans of Care. The expansion project is being formally evaluated by OHSU. OHA is collaborating with Comagine Health to support sites in creating integrated sustainable models to best fit available resources in rural communities and to implement data collection and monitoring systems.

Opioid Treatment Program (OTP)

State Lead: [John Mcilveen](#)

OTPs provide MOUD for people diagnosed with an OUD. MOUD patients also must receive counseling, which can include different forms of behavioral therapy. [SAMHSA's Division of Pharmacologic Therapies \(DPT\)](#), part of the SAMHSA Center for Substance Abuse Treatment (CSAT), oversees the certification of OTPs. OTPs must be certified by SAMHSA and accredited by an independent, SAMHSA-approved accrediting body to dispense opioid treatment medications. All OTPs also must be licensed by the state in which they operate and must register with the DEA.

Local Public Health Agency (LPHA) Overdose Prevention Funded Agencies & Regions

State Lead: [Courtney Fultineer](#)

As part of Oregon’s OD2A funding from the CDC and SAMHSA’s SOR funding, OHA Injury and Violence Prevention Program (IVPP) funded LPHAs in 11 regions to support local overdose prevention efforts. Eleven regional partnerships, covering 23 of 36 counties, are awarded \$1.4 million, each funding year, to improve local systems for preventing and responding to opioid and other drug overdoses. The grant funding for this current work began on October 1, 2020, and continues through August 31, 2024.

Additional Resources

Resource	Description
CD Summary: Prescribing Opioids for Chronic Pain: Guidelines are one piece of the puzzle	<p>The CD Summary is a publication by the Oregon Health Authority, Public Health Division. The CD Summary, “Prescribing Opioids for Chronic Pain: Guidelines are one piece of the puzzle” is devoted to the topic of opioid prescribing guidelines for chronic non-cancer pain.</p>
Guide for CCOs: Reducing Opioid Overdose, Misuse, and Dependency	<p>The Guide for CCOs: Reducing Opioid Overdose, Misuse, and Dependency is a resource to help CCOs develop a comprehensive approach to reducing opioid overdose, misuse, and opioid use disorder. CCOs play an important role in helping their members/patients manage pain while minimizing the risk of adverse effects due to opioid use.</p>
Improving Addiction Care Team (IMPACT) program from Oregon Health & Science University	<p>This collection compiles research and implementation materials from the IMPACT program from OHSU. IMPACT is an interprofessional, hospital-based addictions team that provides addiction medicine consults to patients being treated at OHSU who have a substance use disorder.</p>
Mental Health & Addiction Association of Oregon (MHA AO) Peer Pain Training Module	<p>The Peer Pain Training was developed through funding from the Injury and Violence Prevention Program at Oregon Health Authority. Collaboratively developed by experts in pain science, people with lived experience, and peer support specialists, this training provides a foundation for understanding pain and how to effectively support people who live with pain.</p>
Naloxone Toolkit for Pharmacists	<p>The Naloxone Toolkit for Pharmacists is a collection of training tools to promote pharmacists to prescribe naloxone and includes patient facing resources, such as posters, bag stuffers, and information sheets, about the availability of naloxone.</p>
Naloxone Training Module for Pharmacists	<p>The “Naloxone: Opioid Overdose, Prevention, Recognition & Response” is an online education training module for pharmacists about the role of naloxone, providing overdose prevention, recognition, and response education to those who have been prescribed opioids, drug users, their families, and their neighbors as a harm reduction intervention that saves lives. Completion of this course is eligible for 0.1 CEUs.</p>
Opioid Use Disorder Treatment: A Toolkit for Oregon Emergency Departments	<p>The Opioid Use Disorder Treatment: A Toolkit for Oregon Emergency Departments provides a basic framework for emergency departments that want to build or strengthen their OUD treatment programs and to offer Oregon-specific resources and examples that can help support their success.</p>

Resource	Description
Oregon Health Leadership Council	The Oregon Health Leadership Council is a collaborative organization working to develop practical solutions that reduce the rate of increase in health care costs and premiums, so health care and insurance are more affordable to people and employers in the state.
Oregon Substance Use Disorder Services Inventory and Gap Analysis	In collaboration with Oregon Health Authority and Oregon Alcohol and Drug Policy Commission (ADPC), researchers from the Oregon Health and Science University - Portland State University School of Public Health (OHSU-PSU SPH) conducted an inventory and gap analysis of service delivery resources available in Oregon to address substance use disorder prevention, harm reduction, treatment, and recovery
Oregon Opioid Prescribing Guidelines	In 2016, Oregon convened a stakeholder Task Force to develop statewide opioid prescribing guidelines . The Task Force approved adoption of Oregon-specific prescribing guidelines, based on the CDC Guideline for Prescribing Opioids for Chronic Pain.
Oregon Pain Guidance Patient Education Toolkit	The Oregon Pain Guidance Patient Education Toolkit provides pain management education for patients about how they can improve their health and better manage their pain.
Oregon Pain Management Commission (OPMC) Pain Management Module	The OPMC Pain Management Module is designed to improve pain care across the continuum and to support all licensed clinicians in the state, facilitating effective collaboration and communication between regulatory agencies, healthcare providers, insurers and patients.
Project ECHO	The Oregon ECHO Network (OEN) is a statewide utility for Project ECHO® (Extension for Community Healthcare Outcomes) programming and support services. The OEN is an interactive educational and community-building experience that allows healthcare professionals throughout the state of Oregon to create a case-based learning environment through the convenience of video connection.
Save Lives Oregon Harm Reduction Supply Clearinghouse	The Save Lives Oregon Harm Reduction Supply Clearinghouse is a collaboration between organizations that provide overdose prevention and harm reduction services across Oregon. Participating organizations can order supplies from the project's approved supply list.
