Subject: FW: 6/24 legislative subcommittee meeting

Good morning,

I wanted to share feedback from a law enforcement listserv where your agenda was shared. I will send each in a separate email. The comment below came from a County with a population of ~350K:

*I was not aware of these substantial changes. I understand the need for more accessible and affordable records, but some of these proposed changes have a **HUGE** fiscal impact to city police and county sheriffs. "Free" up to 100 pages would decrease my revenue by \$25,000 every fiscal. While that may not seem like a lot of money to members of this advisory council, every single bit of revenue helps offset personnel costs for staff fulfilling these requests. And a great deal of time is spent fulfilling requests (at least 1.25 FTE at our agency). Clearly, with \$25,000 revenue a year, and 1.25 FTE, our fees are more than reasonable.*

Unfortunately this agenda and proposed legislation doesn't accurately represent parties such as OLERA who fulfill public record requests daily. I am looping in both OSSA Executive Director and the OACP Executive Director and LE lobbyist on this. I would assume that collectively, OLERA objects to a good portion of these proposals.
